C-O-N-F-I-D-E-N-T-I-A-L NOFORN 50X1-HUM - 2 -3. Although one company was named the Interpreter Company, most of the interpreting during the instruction, training, and building during the beginning of the 50X1-HUM course was done by some Russian (either very old or very young) who have been attached to the school for this purpose. they had ever had military service but in their work they did not appear knowledgeable in either Russian military terminology and were often 50X1-HUM ridiculed at the school. As the students learned Russian, which was students learned Russian, which was taught as a subject, these interpreters disappeared slowly and the lectures were given without an interpreter. 4. The platoon was considered the basic unit of operation, and training stressed the action of the platoon in offense, defense, and support. The first year the students had to learn the Russian language and were taught the theory of infantry platoon action. During this year they were also obliged to help in the construction of the school buildings. Among other subjects taught were military terminology, close order drill, Soviet weapons and their use, artillery, and artillery support. Tactical problems in platoon actions were studied mainly in the second year of the course. 5. Several times during training taken to firing ranges located north of Chirchik (N 41-29, E 69-35). They were transported in trucks to an taken to firing ranges located 50X1-HUM area specially chosen for them apart from areas where Soviet troops trained. During the entire course they had no contact with Soviet units. Several Soviet platoon-sized teams had demenstrated tactics and weapons at the school sometime during the course 50X1-HUM 6. The training was rigorous and tiring and lasted over fifteen hours each day. The students lived in tents while they were training and building their permanent quarters. They were not required to do any heavy kitchen work. Those who had been former lieutenants or higher officers of the guer guerrilla forces were paid about 250 rubles a month; the others without rank were paid about 70 rubles. Clothes, toilet articles and tobacco were provided. 50X1-HUM 7. The Communist Party was well represented at the school, and the political agitators kept the morale high among the Greeks. At the time of their graduation thought they would form the nucleus of a new guerrilla army, but political circumstances made this impossible. Their second prospect of being commissioned in the Soviet armed forces also faded when they were merely released and sent back to work in the industrial plants from which they had come a Site Layout and Description the size of the school compound was about 700 meters by 50X1-HUM 300 meters. all the buildings shown in Figure 1 (Page 4),

8. sketch of the school, were completed. Following is a description of the points indicated on the sketch:

Points No. 1 and 2: Large brick one story buildings called study halls, approximately 60 meters by 25 meters. They had cement floors. They were used for indoor training, classes, etc. There were stages and benches and a motion picture screen.

Points No. 3, 4, 5, and 6 were identical. They were barracks of brick, one story, about 30 meters by 10 meters. They had three entrances. See Figure 2 (Page 5) for a layout of these barracks

C-O-N-F-I-D-E-N-T-I-A-L

C-O-N-F-I-D-E-N-T-I-A-L 50X1-HUM Following is a description of points on the attached sketch No. 2 of the site layout of the school: 1. Enclosure: The west side was a barbed wire fence approximately one and one half meters high. The south side was a brick wall about two meters high. The east and north sides were of concrete about two meters high. The entire school compound occupied an area about 350 meters long and 250 meters wide. 2. Guard's booth: At the main entrance of the school. One story, made of brick, about two meters long, two meters wide and two meters high. One-story building made of brick, about ten 3. Retail store: meters long, four to five meters wide and three meters high. This building was divided into a barber shop and a grocery and meat store. There was a street entrance, and the store was open to the public 50X1-HUM 4. Football (Soccer) An oval shaped area approximately 100 meters stadium: long and 50 meters wide used for physical training. 5, 6, Barracks: One story, made of brick, about 35 to 40 meters long, ten meters wide and six meters high, These buildings housed approximately 125 students each. They also had recreation and reading rooms. Companies No. One, Two and Three lived in these barracks. 7. 8. Classrooms: One story, made of brick, about 35 to 40 meters long, ten meters wide and six meters high. The buildings were divided into about 12 classrooms. 9, 10. Barracks: Same as Points 5 and 6 above. Company No. Six was housed in barracks at Point 9. Companies No. Four and Five were housed in the barracks at Point 10. ll. Vehicle entrance: Gates were kept closed except when a vehicle was entering or leaving. One story, made of brick, about eight meters 12. Vacant building: Long, four meters wide and two and one half meters high, The store and barber shop at Point 3 were originally in this building but 50X1-HUM it was vacant 13. Dining hall: One-story brick building, about 40 meters long, 15 meters wide and seven meters high. Five hundred students could be accommodated at one time. 14. Headquarters: One-story brick building, about 25 meters long, ten meters wide and five meters high. The administrative offices of the school were in this building. 15. Warehouse: One-story brick building, about 20 meters long, ten meters wide and six meters high. Clothing and weapons were issued at this building.

NOTORN 50X1-HUM C-O-N-F-I-D-E-N-T-I-A-L 50X1-HUM - 2 = 50X1-HUM War II exploits. A Lt. Colonel Slipnikov (fnu) (phonetic spelling) appeared to be either the adjutant to General Abakidze or a deputy commander. Major Garus (fnu) (phonetic spelling) was the officer in charge of artillery training. A Lt. Smirnov (fnu) platoon commander When the students completed their military training at the school no formal graduation took place, but a parade was held and General50X1-HUM Abakidze aldressed the students. He told them that the military had done all they could for them, but it was regrettable that the military training they received could not be applied at that time. He did not elaborate 50X1-HUM The students did not receive any documents to show that they had completed this training, but they were told that they could consider themselves 50X1-HUM junior lieutenants. All the students who attended this school returned to the jobs they held before taking the course. 5. The six hundred were organized as a battalion consisting of the following: Two Tank Companies - One company received training on the T-34 tanks. The other company was taught the proper maintenance of the T-34. One Mountain Artillery Battery One 122-millimeter Howitzer Battery One Signal Communications Company One Anti-Tank Battery Each company or battery had about 100 men. 50X1-HUM 6. There were about twelve Russian-speaking assigned to the school as interpreters at the beginning of the course, but as the students acquired a knowledge of Russian the interpreters left. Although the interpreters were civilians they were authorized to wear uniforms. 7. The first year of study was devoted to the following subjects: Russian, Language, History with emphasis on Russian and Soviet military history. Mathematics, Physics, Map Reading, First Aid, Drill, and Artillery Nomenclature. In the second year the students concentrated on the particular branch of arms to which they were assigned. Each student was 50X1-HUM given the opportunity to act as a battery commander and to solve all the theoretical, tactical, and practical problems given to him while the other students took the part of soldiers under his command. The third year was a continuation of the second, with emphasis on specialized training. 8. Following is a description of points on the attached sketch of the 50X1-HUM site layout of the school: 1. Club: One story building made of red brick with a red tile roof fifteen meters long and ten meters wide. 2. Headquarters Building One story high, made of red brick with a tille roof twenty meters long and five meters wide. The Commandant's effice was in this building. 3. Barracks: One story high, made of red brick with a tile roof ten meters long and eight meters wide. This building housed the Auxiliary Company referred to in paragraph 3 above.
